AC/DC Charger for Lithium Ion Video/Digital Batteries

The Empire VBC series of AC/DC chargers are state of the art battery chargers for the new lithium ion batteries used in many camcorders and digital cameras. A separate charger is available for most items. There is no reason to pay for plates you cannot use. Simply order the appropriate VBC charger you need using the corresponding Empire battery model number followed by the letter "P".

If you are selling Lithium Ion camcorder batteries, this is the charger line you need. Many Sony and Canon cameras do not include a separate charger.

NEW - All chargers are now available with optional travel version 100-240V AC adaptor. Just add suffix /220 after part number such as VBC-153P/220.
